

HBQ-Z202A 自动盲堵插入机

HBQ-Z202 AUTOMATIC CAVITY PLUGS AUTO-INSERT MACHINE MACHINE

产品介绍 Introduction

HBQ-Z202A自动盲堵插入机采用模块化快速换型设计，采用护套振动盘自动上料、盲堵自动送料、自动插入、自动检测、不良品自动分离等功能。操作简单、方便，生产效率高，产品品质好，可以满足汽车、电子线束的各种加工需求。

HBQ-Z202 automatic blind plug in machine adopts modular fast change design, can be compatible with a variety of sheath, with sheath storage, blind plugging, automatic feeding, automatic insertion, automatic detection, automatic separation of defective products and other functions. The operation is simple and convenient, the production efficiency is high, the product quality is good, and it can meet the various processing requirements of automobile and electronic wiring harness.

特性 Feature

- 双插入工站，可插入两种盲堵
- 护套自动上料
- 盲堵自动送料
- 盲堵自动插入
- 视觉检测
- 不良品自动分离
- Double insertion station, you can insert two kinds of blind plug
- Jacket automatic feeding
- Blind block automatic feeding
- Blind block automatically inserted
- Visual inspection
- The defective product is automatically separated

技术参数 Specifications

型号	Type	HBQ-Z202A		电源	Power supply	AC220V/50Hz
功能	Function	护套振动盘自动上料	Automatic feeding the housing through vibration	功率	Power	1500W(max)
		双插入工站，可插入两种盲堵	Dual insertion stations for inserting two different cavity plugs	气源	Air supply	0.5~0.7Mpa
		盲堵自动送料	Auto-feed for cavity plugs	环境温度	Temperature	0~40℃
		盲堵自动插入	Auto-insert for cavity plugs	本机尺寸	Dimensions(mm)	L2300 × W1100 × H1900
		视觉检测	Visual inspection	重量	Weight	1000Kg
		不良品分离	Separation of the defectives
